TECHNOLOGY
INFORMATION (JAITI)

THIS ISSUE HAS BEEN AVAILABLE ONLINE SINCE JUNE 21, 2026,
AS THE REGULAR JUNE 2026 EDITION.

**ALL ARTICLES ARE RESEARCH ARTICLES WRITTEN BY 62
AUTHORS FROM 12 INSTITUTIONS**

**UNIVERSITAS SAM RATULANGI, UNIVERSITAS HASYIM
ASY'ARI, INSTITUT SENI BUDAYA INDONESIA TANAH PAPUA,
UNIVERSITAS TEKNOKRAT INDONESIA, UNIVERSITAS JEMBER,
UNIVERSITAS ISLAM NEGERI SIBER SYEKH NURJATI CIREBON,
POLITEKNIK NEGERI CILACAP, UNIVERSITAS PGRI SEMARANG,
UNIVERSITAS BINA SARANA INFORMATIKA, UNIVERSITAS
MUHAMMADIYAH PROF. DR. HAMKA, INSTITUT TEKNOLOGI
SUMATERA, UNIVERSITAS MERCU BUANA
FROM INDONESIA.**

TECH CART PRESS

General Information

Journal of Artificial Intelligence and Technology Information (JAITI) is a peer-review journal focusing on Artificial Intelligence and Technology Information issues. Journal of Artificial Intelligence and Technology Information (JAITI) invites academics and researchers who do original research in artificial intelligence and technology information. Journal of Artificial Intelligence and Technology Information (JAITI) is published by Tech Cart Press in March, June, September, and December every year. Journal of Artificial Intelligence and Technology Information (JAITI) accept articles in Bahasa Indonesia and English.

Journal of Artificial Intelligence and Technology Information (JAITI) has ISSN 2985-6396 (Online) in accordance with the letter of Statement Number 29856396/II.7.4/SK.ISSN/02/2023, and ISSN 2985-5306 (Print) in accordance with the letter of Statement Number 29855306/II.7.4/SK.ISSN/02/2023.

We are proud to announce that our journal has successfully achieved accreditation from the Kementerian Pendidikan, Kebudayaan, Riset, dan Teknologi with Number: 156/C/C3/KPT/2026 with a SINTA 4. This achievement is the result of the dedication and hard work of the editorial team, reviewers, and writers who have contributed to maintaining the quality of the published articles. With this accreditation, we are committed to continuing to improve the quality and relevance of published research, as well as expanding the scientific impact on the national and international scope. Thank you to all parties who have supported the development of our journal. We hope that this journal will continue to be a forum for the publication of high-quality scientific works in the future.

Focus and Scope

Journal of Artificial Intelligence and Technology Information (JAITI) is a periodical journal of scientific publication of the results of studies and original research in the science of Artificial Intelligence and Technology Information. Journal of Artificial Intelligence and Technology Information (JAITI) was built with the aim to expand and create innovative concepts, theories, paradigms, perspectives, and methodologies in the sciences of Artificial Intelligence and Technology Information. The articles published in the Journal of Artificial Intelligence and Technology Information (JAITI) can be the result of conceptual thinking, ideas, innovation, creativity, best practices, book review, and research results that have been done.

The study of other sciences that examine topics related to Artificial Intelligence and Technology Information is not limited to: Decision Support System, Data Mining, Expert system, Big Data, Text Mining, Internet of Things, Machine Learning, Artificial Intelligence System, Information System, Mobile computing, and Other Relevant Study Topics.

Open Access

Journal of Artificial Intelligence and Technology Information (JAITI) provides direct open access to its content on the principle of making scientific articles freely available to the public and supporting greater global knowledge exchange. By adapting The Budapest Open Access Initiative, this journal allows readers to read, download, copy, distribute, print, search for, or link to the full text of its articles and use it for other legitimate purposes. However, the works/articles in this journal are also tied to The Creative Commons Attributions-ShareAlike 4.0 International License.

Editorial Foreword

Assalamu'alaikum Warahmatullahi Wabarakatuh,

We would like to express our gratitude to Almighty God for the publication of the latest issue of the Journal of Artificial Intelligence and Technology Information (JAITI). As a scientific journal focusing on the development and application of artificial intelligence and information technology, JAITI remains committed to serving as a high-quality publication platform for academics, researchers, practitioners, and students to disseminate innovative and impactful research findings that contribute to the advancement of science and technology. JAITI is published regularly four times a year by Tech Cart Press and accommodates publications in both Indonesian and English.

The rapid advancement of artificial intelligence, machine learning, data mining, decision support systems, the Internet of Things, data analytics, and various other fields of information technology has brought significant transformations across many sectors of society. Therefore, the need for scientific publications capable of bridging research outcomes with practical implementation has become increasingly important. Through this issue, we present a collection of articles addressing current issues, innovative methodologies, and technology-based solutions that are expected to contribute to both academic and industrial communities. We would like to extend our sincere appreciation to all authors who have entrusted their scholarly works to be published in JAITI. Our highest gratitude is also directed to the reviewers and members of the editorial board who have dedicated their time, effort, and expertise to maintaining the quality of each manuscript through an objective and constructive review process. Their contributions play a vital role in upholding the academic standards and scientific integrity of this journal.

We hope that the articles published in this issue will serve as valuable references, broaden scientific perspectives, and encourage the emergence of more innovative future research in the fields of Artificial Intelligence and Information Technology. We also invite researchers, academics, and practitioners to continue participating in the advancement of knowledge through the publication of their best scholarly works in JAITI.

Finally, we hope that this issue will provide broad benefits to readers and contribute to the advancement of research, innovation, and the application of information technology and artificial intelligence at both national and international levels.

Thank you for your continued support of JAITI.

Wassalamu'alaikum Warahmatullahi Wabarakatuh.

Sincerely,

Editorial Team Journal of Artificial Intelligence and Technology Information (JAITI)

Table of Content

Title	Page
Development of a Web-Based Liturgical Presentation System with Quick Switch and QR Code Using R&D Method	65-75
Implementasi Speech Recognition dan Levenshtein Distance pada Aplikasi Pembelajaran Huruf Hijaiyah Berbasis Android	76-88
Aspect-Based Sentiment Analysis of Public Opinion on the Free Nutritious Meal Program using BERTopic on X	89-104
Klasifikasi Gerakan Tari Bali Perempuan Menggunakan Metode Spatial-Temporal Graph Convolutional Network (ST-GCN)	105-119
Penerapan Metode K-Means Clustering dan Principal Component Analysis (PCA) untuk Pengelompokan Provinsi di Indonesia Berdasarkan Indikator Pendidikan	120-131
Pemilihan Fitur Berbasis Algoritma Metaheuristic untuk Meningkatkan Klasifikasi Tingkat Kesehatan Masyarakat di Pulau Jawa	132-142
Implementasi Algoritma Fisher-Yates Shuffle pada Game Edukasi Pengenalan Buah dan Sayur Berbasis Android	143-154
Sistem Pendukung Keputusan Penerimaan Staff Keuangan Menggunakan Pembobotan ITARA dan Perangkingan SMART	155-170
Automatic Dewey Decimal Classification of Indonesian Book Metadata Using IndoBERT with Weighted Loss and Context Enhancement	171-181
Sistem Rekomendasi Parfum Lokal Berbasis Web Menggunakan Content-Based Filtering dan Cosine Similarity	182-193
Development of a Web-Based First-Person Game of the Legend of Toar and Lumimuut Using Three.js	194-202
Comparative Analysis of Hybrid ARIMA-LSTM against Statistical and Machine Learning Benchmarks for Commodity Stock	203-216
Web-based E-Commerce Application for MSME in Manado	217-235
Performance Analysis of ECS Architecture in 2D Mobile Game Development: Ocean Hero	236-244
Enhancing Sentiment Classification Performance on Tentang Anak Application Reviews Using Optimized Support Vector Machine	245-258
Optimasi Metode Klasifikasi dengan Particle Swarm Optimization (PSO) dan Perbandingan Split Data untuk Prediksi Penyakit Diabetes	259-268
A Pythagorean Fuzzy-Based MUNRA Method for Handling Uncertainty in Complex Decision Environments	269-286
Klasifikasi Serangan Web Berdasarkan Log Web Application Firewall (WAF) Menggunakan Support Vector Machine (SVM)	287-299
Pengelompokkan Titik Panas Menggunakan Algoritma DBSCAN di Provinsi Sumatera Selatan	300-313
Analisis Sentimen Masyarakat terhadap Profesionalisme Generasi Z di Dunia Kerja Menggunakan Support Vector Machine (SVM)	314-329
Manajemen Proyek Sistem Informasi Persediaan pada PT. Bandung Scientific Technical Indonesia (PT.BSTI)	330-340
